---

They said we didn't have to do labs today because they would check us tomorrow so no appointments today !!! We are so thankful to God that he is STILL not sick from these drugs. He has been in a good mood and keeping his feeds down completely. We couldn't ask for more during these really hard chemo drugs.

Dear God,

We continue to pray for restoration of his vocal cords and that his swallow improves .... We are so grateful for this week and how easy you made this round so far. We will glorify you and endlessly thank you for this week.
